Microsoft

## Cloud... what cloud?

We're still a  
few years away

I am very  
happy with  
on premise

Our team  
and systems are  
not ready for  
Cloud

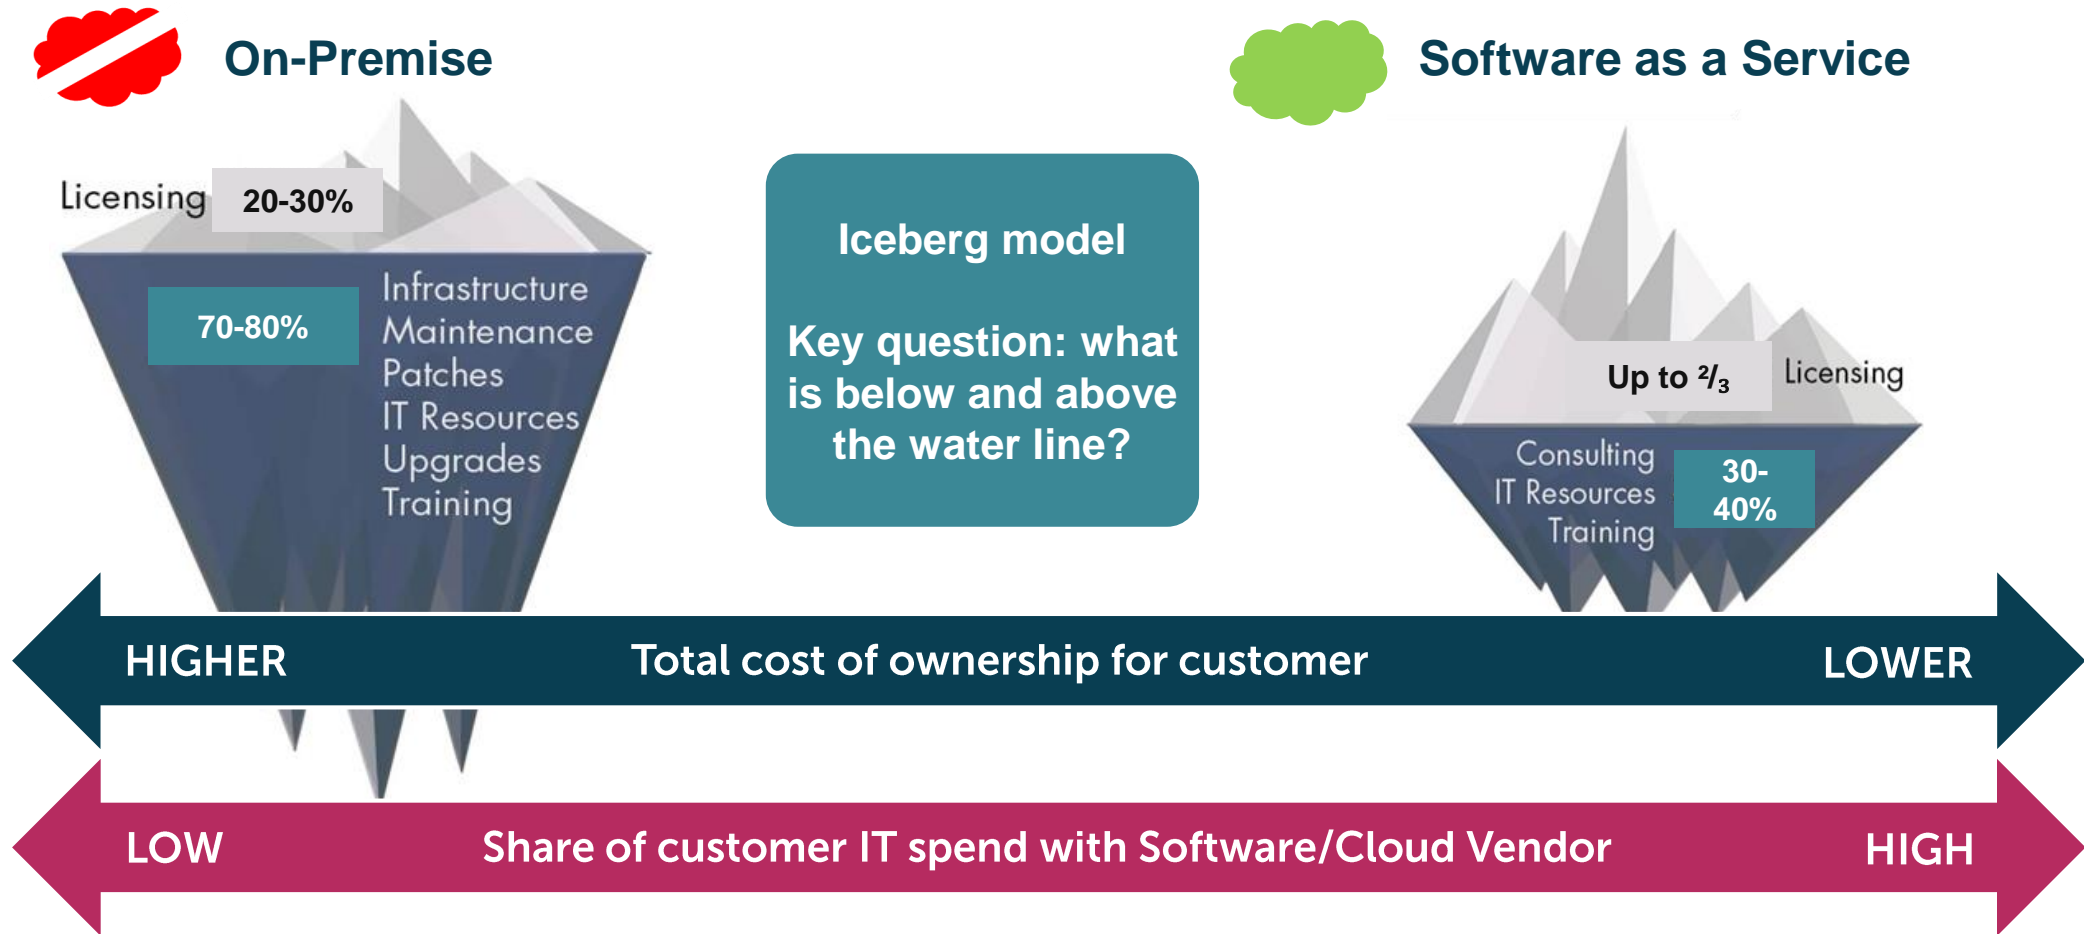

**If I Can't See It It Isn't  
Happening**

---

Cloud... what do you mean?

“ The pace of change  
has never been so  
fast, and yet it'll never  
be this slow again ”

# The way people use “SaaS” is a bit cloudy!

---

# What can we learn from my experience at SAP?

## “The Cloud company”

### World leader in Enterprise Software

- ▶ One of world's 100 highest valued companies
- ▶ 400,000+ customers
- ▶ 95,000+ employees
- ▶ €25bn+ in revenues

---

## Insight #1: Cloud adoption is coming faster than you may think

In 2014, SAP expected to reach the time when customers would buy as much Cloud than on premise for new contracts **around 2020**

In the UK, it began **in 2016**

**Don't assume we are years away (even if you might not be convinced yet), the time is now**

---

## Insight #2: Cloud is the door opener to new technologies

Digital transformation and cloud migration are **multi-year journeys** that will transform the way we work

At SAP, possibly the most important reason customers moved to Cloud was not Cloud itself, but the fact it **opened up access to the new technologies** (AI, chatbots, analytics, etc.)

Even if you are not ready to migrate everything to the cloud, focus on building a vision for the journey: prioritise where cloud-enabled technologies will help you serve your customers for the next 10 years

---

## Insight #3: Beyond technology, cloud is a culture change

For SAP customers, migrating to cloud means **rethinking the way they work**, as typically the processes as well as the user experience within cloud applications are simplified (e.g. to embrace best practice)

But with cloud enabling flexibility, faster pace of change, and new technologies, it was also an **opportunity to improve how they work**

**Cloud is a culture shift where not only the applications change but also the way you work and interact with technology. And therefore a unique opportunity to rethink how you work**

---

## Insight #4: This is about finding a trustworthy partner for the journey

Many SAP customers knew they had to move to the Cloud  
but not **how** to do it

Most of value was created from thinking about **value & transformation**, not just technology

**This is an essential transformation, you need to look for a partner you can trust to go on that journey**

# The world has been talking about cloud for some time now

## What's changed?

- #1** Public Services are ready to embrace Cloud, and looking for a trustworthy partner for the journey
- #2** Cloud solutions are better, faster, cheaper and greener... than ever before
- #3** We at Civica are Cloud centric, ready to help our customers with this wave of growth

---

# What I've gathered about public services after 5 months at Civica

- #1** Your budgets have increasingly been constrained, austerity has taken its toll
- #2** Your citizens expectations are changing fast with technology, especially the younger generation
- #3** Your team and your other colleagues are pushed to achieve more every day
- #4** Security is increasingly complex, and regularly you have to address new compliance requirements
- #5** The number of IT systems you manage and the complexity of your IT environment is (very) high

**Spoiler alert – a controversial view is coming**

**It is meant to be thought-provoking, not offend in any way**

---

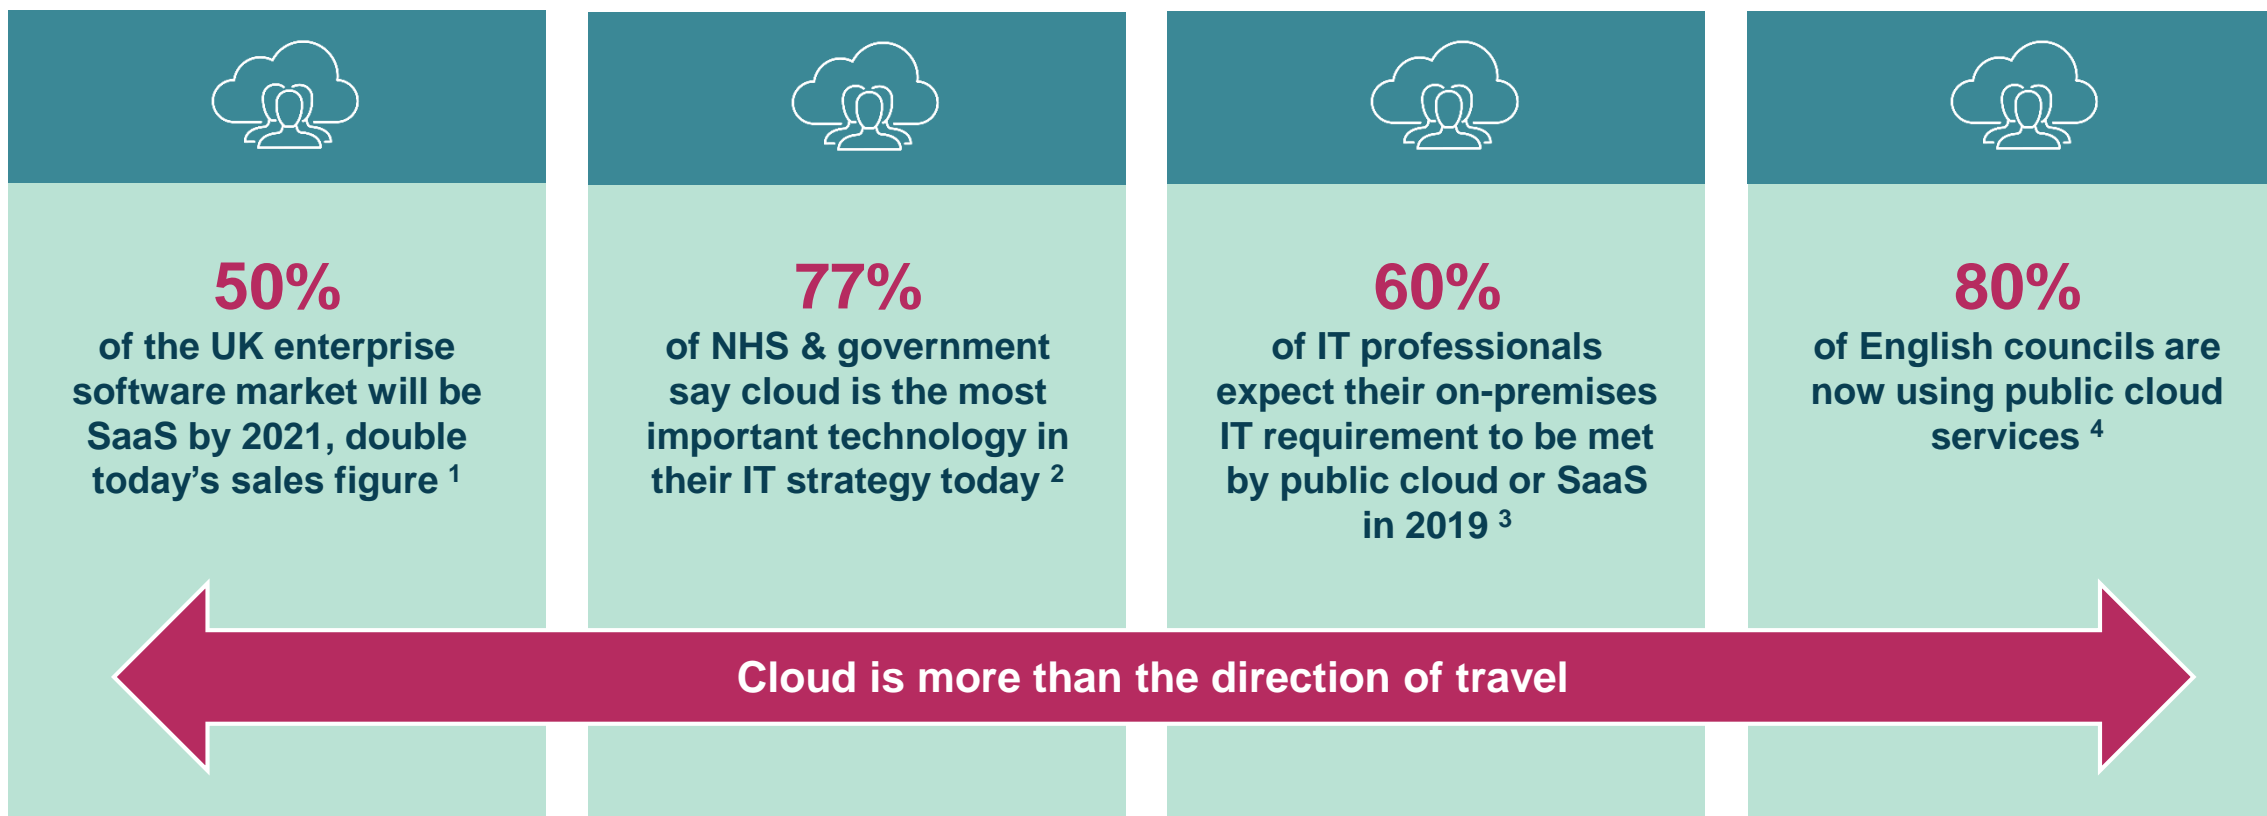

# My controversial view as to why public services have to embrace cloud now

- #1** Your budgets have increasingly been constrained, austerity has taken its toll  
**My controversial view: You can't afford the real cost of old technology anymore**
- #2** Citizens expectations are changing fast with technology, especially the younger generation  
**My controversial view: You're already behind citizens' expectations, especially the younger ones**
- #3** Your team and your other colleagues are pushed to achieve more every day  
**My controversial view: Despite your best efforts, you can't offer the systems required to deliver more**
- #4** Security is increasingly complex, and regularly we have to address new compliance requirements  
**My controversial view: You're likely already behind on the changes needed for security & compliance**
- #5** The number of IT systems you manage and the complexity of your IT environment is (very) high  
**My controversial view: You can't cope anymore with the complexity/inflexibility of your legacy systems**

**There is no other rational choice than to embrace Cloud**

# Cloud is at a tipping point in Public Services – don't just take my word for it

Source: 1 TMV; 2 Solarwinds; 3 Research 451; 4 GovTech Leaders

## So – why should you move to the cloud?

**To put it simply: it's better,  
faster, cheaper ... and greener**

**“Cloud provides the scalability that's  
critical to a rapidly growing and  
evolving organisation like us”**

**PeoplePlus**

**“Migrating to the cloud will enable  
us to save as much as 40% over the  
next 10 years — potentially up to £3.5m”**

**University of Roehampton**

# We at Civica are cloud-centric

**1,000+ customers use cloud-based Civica solutions**

**Majority of new contracts signed with our customers are now Cloud**

**Over 250 Civica products & services on the UK Government's G-Cloud framework**

**Great successes across our markets from Local Gov to Health & Care, Education or Housing**

**Stronger momentum then ever for Cloud with our Digital Services customers**

**Not only helping customers with Civica Solutions but also with broader Cloud agenda**

Tees, Esk and Wear Valleys   
NHS Foundation Trust

£8.8m multi-product deal, 7500 users accessing Paris system daily

Government of South Australia  
Department for Education

10-year partnership to provide cloud suite for 900 schools across SA

**Rail Delivery Group**

Product Management System for 6m ticket prices & 20m possible journeys

**Alliance Homes**

IT modernisation to consolidate on Cx Housing & Coldharbour platform

Managing driver offender re-training courses for 1.4m people a year

University of Roehampton  
London

Cost-effective migration to Azure  
initial projected savings of £3.5 million.  
Increased to **£4.18 million in 2.5 years**

---

**Don't wait until it's too late. The time is now**

**2019, the year of  
the Cloud?**

---

**The time for a cloud-enabled future is now**

- #1** Public Services are ready to embrace Cloud, and looking for a trustworthy partner for the journey
- #2** Cloud solutions are better, faster, cheaper and greener... than ever before
- #3** We at Civica are Cloud centric, ready to help our customers with this wave of growth

**Are you ready? Now is the time to start your journey!**

**Let's partner and accelerate your digital future**

Cloud

IS  
COMING

**Our unique approach makes us a trusted partner at every stage of the cloud journey**

## Cloud Readiness Assessment

Aligning the benefits of cloud adoption with your strategic business requirements

## Cloud Migration

Expert technical, transition and project management for a successful cloud migration, enabling you to realise the benefits to your business

## Cloud Management

Expert end-to-end management of your private, public or hybrid cloud infrastructure

## Cloud Optimisation

Helping you to maximise the value of your public cloud environments and gain transparent control of costs

Optimise

# Housing Technology 2019

Felix Ashwood  
Microsoft  
Territory Channel Manager

“You join here [Microsoft]  
not to be cool, but to make  
others cool”

# Accessibility: required by 1+ billion; benefits all

Accessible technology benefits everyone, including people with:

- Permanent disabilities like those listed below
- Temporary impairments like cataracts or a broken arm
- Situational requirements like working hands-free and eyes-free while driving.

## Visual

- Colorblind
- Low vision
- Blind

## Hearing

- Hard of hearing
- Deaf

## Cognitive

- Learning disabilities
- Autism
- Seizure

## Speech

- Speech impediment
- Unable to speak

## Mobility

- Arthritis
- Quadriplegia
- Spinal cord injury

## Neural

- Bipolar
- Anxiety
- PTSD
- OCD
- Depression

**Disabilities come in many forms both visible and unseen**

Any questions?
